9. (4 pts) Consider the following world that has the three objects: hare, penguin and flamingo (shown below from left to right), and given code. The world has been setup as shown below. The penguin is exactly 1.0 meter from the hare, and the penguin is exactly 1.0 meter from the flamingo.

The diagram below is looking from above over the scene. The hare is represented by the square, the penguin is represented by the circle, and the flamingo is represented by the hourglass. Using the diagram below, draw the path of hare as a solid line and the path of flamingo as a dashed line.
